AskAgent™ vs Search Engines

The AskAgent™ can save hours and hours of Internet search time per query.

Question: "I need to develop a site audit plan for an IT company..."

Search engines produce millions of links, which users must click through to find the answer.

Google search results for "site audit plan". The search bar shows "site audit plan" and "Search". Below the search bar, it says "Search: the web pages from New Zealand". The results section shows "Results 1 - 10 of about 10,500,000 for site audit plan". The first result is "Larry Bodine Marketing, Marketing Strategy, Individual Coaching ..." with a URL "www.larrybodine.com/Consulting_Services.htm". The second result is "AuditNet: Internet Web Portal for Auditors!" with a URL "www.auditnet.org/intaudit.htm". The third result is "AuditNet: Audit Work Programs" with a URL "www.auditnet.org/asapind.htm". There are also links for "21 CFR Part 11" and "How To Live Through An FDA Audit".

AskAgent response from Mecha J. Council Member on Ammas.com. The response discusses auditing and provides several references. The references are: 1) <http://msdn.microsoft.com/archive/d...> has good details on what is capacity to measure it. 2) <http://www.devarticles.com/c/s/SQL-...> 3) <http://www.windowsecurity.com/artic...> 4) <http://www.thema.org/taudit/index...> gives the broad categorization. 5) <http://www.techpathways.com/uploads...> for virus scans.. 6) <http://nces.ed.gov/pub2003/mainten...> has all the details. Concentrate on doing on your documents as they evolve the best results.

Note that Internet can be used as a medium to accumulate or gain knowledge, but it can not be the means. It can not achieve the final delivery.

Only your mind can understand, grasp the situation and provide the desired result. Rest all might turn out be a cut copy paste job and will not yield a true sense in an audit! Good luck!!
